

—DATA ANALYST · DUBLIN, IRELAND

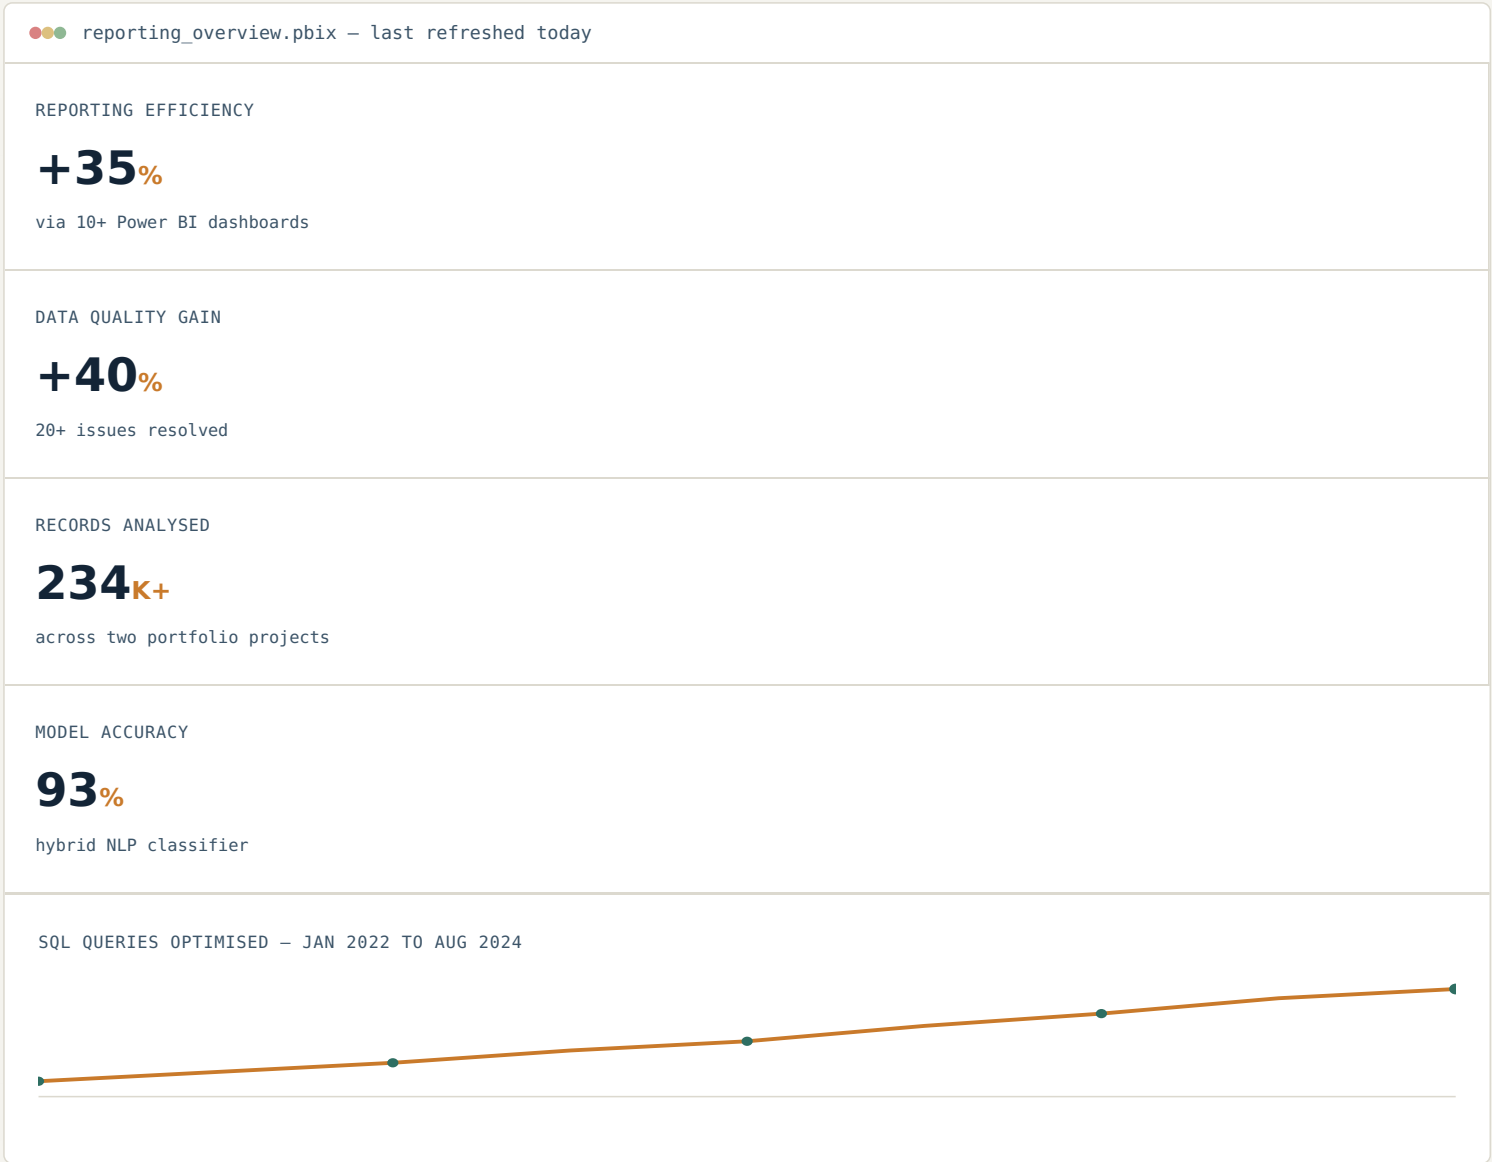

I turn raw data into decisions your stakeholders actually act on.

2.5+ years building dashboards, cleaning up messy datasets, and translating SQL results into insight leadership trusts — currently open to Data Analyst, BI, and Reporting roles across Ireland.

01About

I'm a Data Analyst based in Dublin with 2.5+ years of hands-on experience turning large, messy datasets into dashboards, KPI reports, and forecasts that hold up under scrutiny. My core loop: pull the data with SQL, clean it until it's trustworthy, visualise it in Power BI, and explain what it means to people who don't have time to read a query.

I recently completed an MSc in Computing (Data Analytics) at Dublin City University, adding a stronger statistical and machine-learning foundation on top of a B.Tech in Computer Science Engineering — which is where the two portfolio projects below came from.

Location	Dublin, Ireland
Experience	2.5+ years
Work rights	Stamp 1G, no sponsorship needed
Education	MSc Computing (Data Analytics), DCU
Core stack	SQL · Power BI · Python
Open to	Data Analyst · BI · Reporting roles

02Skills

QUERY & DATA

SQL — Joins, CTEs, Window Functions

Query Optimisation

ETL & Data Wrangling

Data Quality & Validation

BI & VISUALIZATION

Power BI — DAX, Power Query

Dashboard Development

KPI Reporting

Google Sheets · Looker

PROGRAMMING & ANALYSIS

Python — Pandas, NumPy, Scikit-learn

Statistical Analysis

03Experience

Jan 2022 – Aug 2024

Data Analyst

Vijaya Kilari Construction Co. · India

- Developed **10+ Power BI dashboards** and automated reporting solutions, improving reporting efficiency by **35%**
- Optimised **50+ SQL queries** and performed statistical analysis on large datasets to support business decision-making
- Resolved **20+ data quality issues**, improving dataset reliability and reporting consistency by **40%**
- Built KPI reports and operational dashboards for stakeholders across cross-functional teams

04Projects

NLP · MACHINE LEARNING

Hybrid Fake News Detection & AI Analytics System

A hybrid framework combining traditional ML models with transformer-based LLMs to classify news articles at scale, backed by full data visualisation and reporting.

134K+ 93%+

RECORDS PROCESSED MODEL ACCURACY

BERT RoBERTa NLP Python SQL
